The assignment → Homework
pp 15-16 #21-35, 47-53

Simplify by combining like terms.

← Instructions

How do I
show simplifying
expressions?

21) $5a - a$
 $= \boxed{4a}$

Use a single column
of exercises, separated
by a blank line.

22) $5 + 10s - 8s$
 $= \boxed{5 + 2s}$
 $= \boxed{2s + 5}$

← Each exercise, including
the given, the work,
the answer, in a box.

← One or two
questions about
the work.

← Cornell Notes →
margin

← Parent initials &
of minutes spent

Summary: What did
I do? What did I learn?
What was interesting?
What questions do I still have?

I simplified expressions. I learned
homework formatting. I don't know
if I'll remember to leave a space
Do I have to write the constant last
